

FINAL TERMS

PROHIBITION OF SALES TO EEA AND UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**") or in the United Kingdom (the "**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (the "**Prospectus Regulation**"). Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA or in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA or in the UK may be unlawful under the PRIIPs Regulation. References in the Base Prospectus (as completed by these Final Terms) to EU legislation will be deemed, for UK purposes, to include references to the corresponding provisions of UK onshored or retained legislation that form part of UK law by virtue of the European Union (Withdrawal) Act 2018.

MIFID II product governance / Professional investors and ECPs only target market – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

<p>What are the key risks that are specific to the issuer?</p>
<p>The Issuer is subject to the following key risks:</p> <ul style="list-style-type: none"> • <i>Risk that funds lent by the Issuer to Group Companies are not repaid:</i> The Issuer is a finance vehicle established by the Guarantor for the purpose of issuing debt securities, preferred securities (<i>participaciones preferentes</i>) and other financial instruments and on-lending the proceeds to the Guarantor and its consolidated subsidiaries (the "Group"). The Issuer is therefore dependent upon other members of the Group paying interest on and repaying their loans in a timely fashion. Should any Group member fail to pay interest on or repay any loan in a timely fashion this could have a material adverse effect on the ability of the Issuer to fulfil its obligations under the Notes which could have an adverse impact on the rights of noteholders and the return on their investment. • <i>Certain Creditors of the Issuer will rank in priority above Noteholders:</i> Under Irish law, the claims of a limited category of preferential creditors will take priority over the claims of unsecured creditors in the event of the appointment of a liquidator or a receiver to an Irish company such as the Issuer. These preferred claims include taxes, such as income tax and corporation tax payable before the date of appointment of the liquidator or receiver and arrear of value added tax, together with accrued interest thereon and claims of employees. • <i>Risks in connection with Examination:</i> Examination is a court procedure available under the Irish Companies Act 2014 to facilitate the survival of Irish companies in financial difficulties. The Issuer, the directors of the Issuer, a contingent, prospective or actual creditor of the Issuer, or shareholders of the Issuer holding, at the date of presentation of the petition, not less than one-tenth of the voting share capital of the Issuer, are each entitled to petition the court for the appointment of an examiner. The primary risks to the Noteholders if any examiner were to be appointed with respect to the Issuer are as follows: the potential for a scheme of arrangement being approved involving the writing down of the debt due by the Issuer to the noteholders; and in the event that a scheme of arrangement is not approved and the Issuer subsequently goes into liquidation, the examiner's remuneration and expenses (including certain borrowings incurred by the examiner on behalf of the Issuer and approved by the relevant court) will take priority over the amounts secured or unsecured owing to the noteholders.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- *The Group's growth, asset quality and profitability may be adversely affected by volatile macroeconomic and political conditions:* A return to recessionary conditions in the economies of Europe (in particular, Spain and the UK), the United States or some of the South American countries in which the Group operates, would likely have a significant adverse impact on the Group's loan portfolio and sovereign debt holdings and, as a result, on its financial condition, cash flows and results of operations. The Group's results are also affected by other market conditions on a global and local scale, such as an increase in protectionism or trade tensions, higher barriers to immigration and the effects of the coronavirus.
- *The decrease in the Group's economic activity and international commerce as a result of the Covid-19 could materially impact the Group:* Since December 2019 a new strain of coronavirus ("**Covid-19**") has spread causing sharp declines on stock markets, a global slowdown in activity and a high level of uncertainty due to its possible impact in the medium and long term on local and global economic activity. The fall in economic activity and in international trade due to the effects of Covid-19 is having a material adverse effect on the economies of the countries where the Group operates. This worsening economic situation, tied to the negative impact that could be caused by greater protectionism, tensions in international trade or barriers to immigration, could have a material adverse effect on the Group's operating results, financial position and business outlook.

- *The Group including the Guarantor is subject to substantial regulation and regulatory and governmental oversight which could adversely affect its business, operations and financial condition:* As a financial institution, the Group including the Guarantor is subject to extensive regulation (including regulation relating to capital requirements, funding and liquidity and the development of a fiscal and banking union in the EU), which materially affects its businesses. Any legislative or regulatory action and any resulting changes to the Group's business operations, as well as any deficiencies in its compliance with such legislation and regulation, could result in significant loss of revenue, limit its ability to pursue business opportunities and provide certain products and services, affect the value of assets that it holds, require the Group to increase its prices and therefore reduce demand for its products, impose additional compliance and other costs on the Group or otherwise adversely affect its businesses.
- *Increasingly stricter capital regulations and potential requirements could have an impact on the functioning of the Group and its businesses:* Increasingly onerous capital requirements constitute one of the Guarantor's main regulatory challenges. Increasing capital requirements may adversely affect the Guarantor's profitability and create regulatory risk associated with the possibility of failure to maintain required capital levels. Any failure by the Guarantor to comply with capital requirements could result in administrative actions or sanctions which may have an adverse impact on the Group's results of operations and new and more demanding additional regulatory requirements, standards or recommendations may be applied in the future. All the applicable regulations and the imposition of any other regulatory requirements could have a material adverse effect on the Group's activities and operations and affect the ability of the Guarantor to fulfil its obligations under the Guarantee.
- *Impairment of credit quality or insufficient provision for non-performing loans could have a material adverse effect on the Group:* Non-performing or low credit quality loans have in the past negatively impacted the Group's results of operations and could do so in the future. In particular, the amount of the Group's reported non-performing loans may increase in the future as a result of factors outside of its control, such as adverse changes in the credit quality of the Group's borrowers and counterparties or a general deterioration in economic conditions in the regions where the Group operates or in global economic and political conditions.

What are the key risks that are specific to the securities?

The Notes are subject to the following key risks:

- *The Notes bear the credit risk of the Issuer and the Guarantor:* Holders of Notes bear the credit risk of the Issuer and the Guarantor. That is the risk that the Issuer or the Guarantor is not able to meet its obligations under such Notes, irrespective of how any principal, interest or other payments under such Notes are to be calculated. In such circumstances holders may lose some or all of their investment.
- *There is no active trading market for the Notes:* The Notes issued will be new securities which may not be widely distributed and for which there is no active trading market on issuance. If the Notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the Issuer and the Guarantor.
- *Hedging activities may affect the market price, liquidity or value of Reference Item Linked Notes:* The Issuer, the Guarantor and/or any of their affiliates may enter into one or more hedging transactions with respect to the Reference Items or related derivatives and such hedging activities or proprietary or other trading activities by the Issuer, the Guarantor or their affiliates may, but are not intended to, affect the market price, liquidity or value of the Notes and which could be deemed to be adverse to the interests of the holders.
- *An investment in ETF Linked Notes is not comparable to an investment in a conventional debt security:* Amounts of interest and principal under the Notes may depend on the price of the relevant ETFs. An investment in the Notes may bear similar market risks to a direct ETF investment but also entails significant risks not associated with a conventional ETF investment. For example, payment of principal or interest may occur at a different time than expected had holders of the Notes invested directly in an ETF investment.
- *Holders will be exposed to the volatility of the market price of ETF Linked Notes:* Holders of the Notes should be aware that the market price of the Notes may be volatile and may depend on the time remaining to redemption and the price volatility of the ETFs.
- *The value of ETF Linked Notes is linked to the performance of the underlying ETFs which may affect the overall return on investment:* The relevant ETFs may trade and invest in a broad range of investments which may be illiquid or only traded on a monthly, quarterly or even less frequent basis. Holders of Notes may be exposed to the volatility in the performance of the ETFs which may affect the overall return on their investment.
- *The occurrence of certain events may adversely affect the value or liquidity of the ETF Linked Notes:* In the event of the occurrence of certain events, e.g. an extraordinary dividend of the relevant ETF, the Calculation Agent may make adjustments in accordance with the terms of the Notes or, in certain cases, substitute the relevant ETF shares or early redeem the Notes. Any such action may reduce the overall return on the investment of the holder or adversely affect the value and liquidity of the Notes.
