APPLY MULTIFACTOR AUTHENTICATION (MFA)

Use multi factor authentication (MFA) whenever possible, as it adds an extra security layer to your accounts. In addition to password, this method requires otherforms of identification that only you have, such as a code sent to your mobile, your fingerprint or facial recognition.

Go to your profile > Settings > Security Two-Factor Authentication > chose security method (Authentication App or Text message)

Go to Settings in you mobile or tablet >[your name] > Password & Security > Tap Turn On Two-Factor Authentication

Go to Settings > Account > Two-Step Verification > Tap enable

Follow on screen instructions for PIN. Then, when propted, provide an email address so that you're not locked out of your account if you forget your PIN.

lin

Tap your profile picture >

Two-step verification >

verification on or off >

tap the toggle to turn twostep

choose the security method

from the dropdown and click

Settings >

Account >

Continue

Google

Go to your Google Account (https://myaccount.google.com/) > Security > 2-Step Verification > Get Started > follow the on-screen steps

Go to Settings > Security and Login Settings > Use two-factor authentication > tap edit > choose security method (SMS codes or third party authentication app)

Tap your profile icon > Settings and privacy > Account > Security > Two-factor authentication > chose security method (Text message or Authentication app)
